### My answers to the questionnaires

- **Is the site user friendly?** There are definitely some aspects that need touching up, but as far as being user friendly I would say that it is. It is simple to navigate and functions properly from a generic standpoint.
- **Is there anything on the site that you feel is unnecessary?** I don't feel as though there is anything that is unnecessary, but things that need touched up.
- **If you could add one additional feature to the site what would it be?** We are going to be working on a review system on the trail sections of the site. This is probably the biggest addition we need to make.
- **Is the site informative to someone interested in hiking or using trails?** I believe so, it definitely covers the generic aspect of the top trails per state. I believe it provides efficient information given its purpose.
- **What would you change about the site if you could?** Making everything flow a little more properly. Meaning have the state pages match a prominent theme etc. Add review section to the state pages etc.
- **Is the site visually appealing?** I think the site is visually appealing and looks pretty good at this time. Especially when the state pages match etc. Everything is going to look pretty awesome in my opinion!
- **What is your favorite thing about the site?** I like Brandon's homepage a lot and think it is very welcoming. I also really like the functioning login and registration and am so happy we finally got it working!
